

Student Consent for Classroom Research

Project Title: RPlus

1. Study Purpose: We, Shruti Jain and Snehitha Ramasahayam are evaluating the efficiency and difficulty level to compare two prototyping tools namely, MockPlus and Azure RP.

2. Procedure and Duration: If you agree to participate, we will use some of the normal course required materials such as surveys and two tasks and analyze some of the data from them. We will screen record your work to collect the qualitative and quantitative data.

The research will be conducted in classroom during the assigned class hours.

Participation is entirely voluntary. If you decide to withdraw your consent before the completion of user study, please contact the lead researchers to ask for your consent form to be returned to you. After the completion of the user study, the researchers will assign a code to your name and then submit the de-identified data so no one will know who participated.

3. Potential Risks and Discomfort: There is less than minimal risk to you from participating. To eliminate any discomfort, we have taken the following precautions to protect you:

- All data used for the research will not include any identifying information about you.
- Research results will be reported only in groups.
- At the end of the semester, the key that links your name to the random number identifiers will be destroyed, so there will be no way to link you to the research data.

4. Incentives/Compensation (if any): There are no incentives to you for participation in this study.

5. Anticipated Benefits to the Subject or to Non-subjects: There are no direct benefits to you for participating in this study.

6. Right to Refusal or Withdrawal of Participation: Your participation in this research is completely voluntary. Your participation or non-participation in the research will have no effect on your course grade. You can withdraw your consent to participate at any time by contacting either Shruti or Snehitha.

7. Assurances of Privacy and Confidentiality: All information used for the research will be de-identified before being provided to the researchers. All information used for presentations will be reported in aggregate so your name or identity will not be used or disclosed in any way.

8. Additional Information:

.....

CONTACT INFORMATION FOR THE LEAD RESEARCHER(S)

1. Name: Shruti Jain	Contact: shruti_jain1@student.uml.edu	Date:
2. Name: Snehitha Ramasahayam	Contact: snehitha_ramasahayam@student.uml.edu	Date:

.....

STUDENT PARTICIPANT AGREEMENT TO CONSENT:

I understand the potential risks and/or discomforts that have been described in this document and by the researcher. By signing digitally below, I am indicating that I have read this document, had the opportunity to discuss any concerns and ask questions about the research, and agree to participate in this study.
